## ISO 9001:2000 Audit Completed for Contract Electronics Manufacturer PPI-Time Zero

*Paterson, New Jersey / February 2008*

Frank Simons, Executive Vice President, Sales and Marketing announced this week that PPI-Time Zero, Inc, has successfully concluded an ISO 9001:2000 Quality Audit.

The audit registrar, DNV Certification, is a division of Det Norske Veritas (DNV), an independent foundation established in 1864. Since that time, DNV has expanded its skill, experience and resources to become one of the world's top leaders in the provision of services to safeguard life, property and the environment. DNV has issued certificates to tens of thousands of businesses operating in all sectors of industry. As a leading international certification body, DNV local units have been awarded accreditation for their certification services by various national authorities.

The DNV Audit Report states, in part, that "PPI-Time Zero has shown a sustained commitment to the competency of its workforce by the continued re-certification of its electrical assemblers to the workmanship requirements of IPC-A-610D. The organization has shown noteworthy agility in the launch projects from Breeze-Eastern." Breeze-Eastern, headquartered in Union, NJ, is the industry leader in helicopter-based rescue hoist and cargo hook technologies with a major share of the global market. "The Breeze-Eastern, PPI-Time Zero multi-year, multi-million dollar long-term agreement is anticipated to continue until at least 2025," said Simons. "PPI-Time Zero will produce electronic sub-assemblies for use in the controls of the Cargo Winch System, Retrieval System and Cargo Crane System for the Airbus A400M Military." The DNV Audit Report also states "it is clear that PPI-Time Zero has a Quality System that is working."

Since 1971, PPI-Time Zero has produced over 20 million electronic assemblies for the high-reliability military, aerospace, medical and industrial controls markets. They manufacture sub assemblies, circuit card assemblies, burn-in boards and complete systems integration using the most advanced design automation technology for a wide range of specialized military applications. Breeze-Eastern is a pioneer in technology for helicopter rescue hoists and cargo winches. The two east coast based companies are committed to establish a mutually beneficial relationship as customer-focused partners to supply superior engineered products.

PPI-Time Zero is an ISO 9001:2000 Registered and HUBZone Certified manufacturer. Their 56,000 square foot facility complies with the requirements of high-performance, high-reliability, industrial and military workmanship and performance standards.
