Underwriters Laboratory (UL) Issues PPI-Time Zero UL 94 Certifications

Paterson, New Jersey / March, 2008

Frank Simons, Executive Vice President, Sales and Marketing announced recently that Underwriters Laboratories (UL), the trusted source across the globe for product compliance, has issued three UL-94 certifications to PPI-Time Zero, including UL94-V-PPI-A Paterson, UL94-V-PPI-B Taiwan and UL94-V-PPI-C India.

UL 94, The Standard for Flammability of Plastic Flame Classifications Materials for Parts in Devices and Appliances is assigned to materials based on the results of small-scale flame tests. The classifications are used to distinguish a material's burning characteristics after test specimens have been exposed to a specified test flame under controlled laboratory conditions. Tests are conducted on plastic materials to measure flammability characteristics to determines the material's tendency either to extinguish or to spread the flame once the specimen has been ignited.

Underwriters Laboratories have tested products for public safety for more than a century and benefit a wide range of customers, including manufacturers, retailers, consumers and regulating bodies. UL has developed more than 1,000 Standards for Safety that are essential to helping ensure public safety and confidence, reduce costs, improve quality and market products and services. Millions of products and their components are tested to UL's rigorous safety standards with the result that consumers live in a safer environment than they would have otherwise.

Since 1971, PPI-Time Zero has produced over 20 million electronic assemblies for the high-reliability military, aerospace, medical and industrial controls markets. They manufacture sub assemblies, circuit card assemblies, burn-in boards and complete systems integration using the most advanced design automation technology for a wide range of specialized applications.

PPI-Time Zero is an ISO 9001:2000 Registered and HUBZone Certified manufacturer. Their 56,000 square foot facility, in Paterson, NJ, complies with the requirements of high-performance, high-reliability, industrial and military workmanship and performance standards.
