Contract Electronic Manufacturer Announces Long-Term Agreement with Breeze-Eastern to Produce Assemblies for Airbus A400M Military

Paterson, New Jersey / August 2007

PPI-Time Zero, Inc, CEO Dana Pittman, announced that a long-term agreement (LTA) has been reached with Breeze-Eastern Corporation, a world leader in the design, development and manufacture of electric and hydraulic load lifting, positioning and restraining products. Breeze-Eastern, headquartered in Union, NJ, is the industry leader in helicopter-based rescue hoist and cargo hook technologies with a major share of the global market. "The Breeze-Eastern, PPI-Time Zero multi-year, multi-million dollar long-term agreement is anticipated to continue until at least 2025," said Pittman.

"PPI-Time Zero will produce electronic sub-assemblies for use in the controls of the Cargo Winch System, Retrieval System and Cargo Crane System for the Airbus A400M Military," said Frank Simons, Executive Vice President of PPI-Time Zero. "Many of our customers, around the world, are superior examples of manufacturing excellence. We are very pleased to have Breeze-Eastern as a partner and to be part of this critical and challenging program."

Since 1971, PPI-Time Zero has produced over 20 million electronic assemblies for the high-reliability military, aerospace, medical and industrial controls markets. They manufacture sub assemblies, circuit card assemblies, burn-in boards and complete systems integration using the most advanced design automation technology for a wide range of specialized military applications. Breeze-Eastern is a pioneer in technology for helicopter rescue hoists and cargo winches. The two east coast based companies are committed to establish a mutually beneficial relationship as customer-focused partners to supply superior engineered products.

PPI-Time Zero is an ISO 9001:2000 Registered and HUBZone Certified manufacturer. Their 56,000 square foot facility, in Paterson, NJ, complies with the requirements of industrial and military workmanship and performance standards. Regardless of the complexity, advanced technology solutions are applied throughout the design and development process to deliver real value to customers and bring superior, high reliability electronic products to market.
