

Our PPI-Time Zero team strives for zero defects and has an excellent record of first pass yields. Delivery of high performance contract manufacturing services to our customers is achieved, in part, by full utilization of our test equipment and exacting procedures.

PPI-TIME ZERO UTILIZES testing procedures to ensure that each and every assembly product passing through manufacturing is thoroughly tested by our skilled technical staff. Delivery of high performance contract manufacturing services to our customers is achieved by full utilization of our specialized testing equipment.

Our team strives for zero defects and has an excellent record of first pass yields. Our test equipment is qualified to meet industry specifications. We consistently utilize custom modeling and tests to reach the highest possible test coverage.

Test and Inspection

- Passive in-circuit testing
- Orientation testing
- Shorts and opens
- Low-voltage / Run-at-speed
- Multi-functional testing
- Fast turn-around
- Engineering and technical expertise
- Test diagnosis
- Off-line analysis time
- Accuracy of repair
